

Moses Andrew Salivio

Computer Engineering Student | Backend & Systems | Full-Stack Web | Technical Lead

saliviomosesandrew8@gmail.com | 0968 626 2910 | Mandaue, Cebu, PH | github.com/Bobecue

SUMMARY

Computer Engineering student (CIT-U, 2028) with hands-on experience in systems-level programming, network infrastructure, and full-stack web development. Proficient in C++, JavaScript/TypeScript, and React; familiar with Linux, Git, and Cisco networking. Proven ability to lead cross-functional teams, manage competing priorities under pressure, and deliver organized, high-quality outcomes. Eager to contribute to production-grade backend systems and data pipelines in a fast-moving engineering environment.

EDUCATION

Bachelor of Science in Computer Engineering

Cebu Institute of Technology – University (CIT-U) | 2025 – 2028

Bachelor of Science in Computer Engineering (transferred)

University of San Carlos (USC) | 2023 – 2025

STEM Track — Baleno National High School | 2017 – 2023

- Graduated with Honors | Athlete of the Year Awardee — recognized for high-performance mindset, discipline, and consistent follow-through under pressure.

EXPERIENCE

Creative Lead & Technical Operations

USC Computer Engineering Creatives | 2023 – 2024

- Led end-to-end delivery of digital initiatives for the USC Computer Engineering organization, coordinating contributors across design, logistics, and technical operations to meet strict event deadlines.
- Managed live stream infrastructure (OBS) and performed real-time technical troubleshooting during high-stakes events, maintaining system uptime and adapting quickly to unexpected failures.
- Established and enforced quality standards across 10+ promotional campaigns and digital assets, demonstrating the detail-oriented, high-bar mindset required for production engineering environments.
- Coordinated cross-functional responsibilities across a diverse team — balancing creative direction with operational execution in a fast-paced, resource-constrained setting.

Student Council Member — Technical & Operations

Senior High School through College | 2021 – 2024

- Consistently led collaborative initiatives across multiple academic organizations, managing team workflows and balancing academic, operational, and leadership responsibilities simultaneously.
- Demonstrated adaptability and ownership in executing cross-team projects with limited direction — mirroring the autonomy expected in a production-contributing internship role.

TECHNICAL PROJECTS & COURSEWORK

Local Athlete Spotlight | TypeScript, React, Vite, Node.js, Tailwind CSS, shadcn-ui

github.com/Bobecue/local-athlete-spotlight | Full-Stack Web App | 29 commits

- Architected and built a full-stack web application with a React/TypeScript frontend (Vite) and a dedicated Node.js backend server — demonstrating end-to-end ownership from UI to API layer.
- Enforced strict TypeScript typing across 97%+ of the codebase; integrated shadcn-ui component library and Tailwind CSS for a consistent, production-quality interface — reflecting a high bar for code quality and scalability.

- Managed the full project lifecycle via Git (branching, commits, version control) across 29 commits; structured project with separate /src, /server, and /public directories following production-grade conventions.
- Collaborated on a forked open-source codebase, navigating upstream changes and integrating custom features — mirroring the cross-functional, code-review-driven workflow at Hayden AI.

Network Infrastructure Design | Cisco, Subnetting, Routing Protocols

- Designed and configured network topologies using Cisco equipment; applied subnetting, routing protocols (static and dynamic), and infrastructure troubleshooting — foundational skills for fleet health monitoring and edge-to-cloud device management.

Systems & OOP Programming | C++, C#, Java

- Implemented performance-critical algorithms and data structures in C++ (memory management, pointers); built structured backend logic in C# (.NET) and class-based applications in Java — directly applicable to edge computing and scalable service development.

SKILLS

Languages:	C++, C#, Java, JavaScript, TypeScript, Python (learning)
Web / Backend:	React, Node.js, Next.js, REST APIs, Tailwind CSS
Infrastructure:	Linux, Git, Cisco, Networking, Subnetting, TCP/IP, OBS
Tools & Design:	Figma, Photoshop, Illustrator, Premiere Pro
Methodologies:	OOP, Agile (standups, sprint planning, retrospectives), Cross-functional collaboration
